

Plus Scheduler

| | |
|-----------------|---|
| Overview | <p>PPM Plus® application suite includes Scheduler, the patient scheduling tool that empowers you to schedule appointments and manage provider and facility hours, and prevents scheduling conflicts in your office.</p> <p>Scheduler imports data from your Plus application suite, providing access to your patient and provider rosters, lists of facilities and insurance payers and plans, and CPT procedure codes for each practice corporation in your enterprise.</p> <p>Graphical, drag-and-drop calendar views let you lengthen appointments, shorten them, or move them in time with a few mouse clicks. Your staff can easily view available appointment times in the calendar view.</p> <p>Use the reporting functions to analyze, report, or print your appointment schedules. Generate reports for appointment listings by patient, by provider, or by facility. Export appointments in charge batches to Charge Entry for completing your medical billing cycle.</p> |
| Features | <ul style="list-style-type: none"> ▪ Customizable encounter forms and reminder letters ▪ Block provider time for individual appointments or recurring appointments ▪ Data sharing between Plus Scheduler and PPM Plus database ▪ Drag-and-drop editing on the appointment calendar ▪ Fully customizable by practice corporation ▪ Multiple user access ▪ Pre-formatted reports for generating Call Lists and Chart Pull Lists ▪ Reporting function for generating appointment lists by patient, provider, or facility ▪ Safeguards against simultaneous bookings for each provider |
| Benefits | <ul style="list-style-type: none"> ▪ Add or update patient, guarantor, or insurance information in Plus Scheduler and have the data available in Charge Entry in the Plus application suite. ▪ Avoid time conflicts—use provider preferences for managing simultaneously bookings. ▪ Backup and maintain your scheduling data for archival purposes. ▪ Eliminate duplicate data entry of patient demographics and insurance information—create charge batch with completed appointments and export to Charge Entry. ▪ Improve efficiency by simultaneously scheduling appointments from different workstations by different users. ▪ Reduce costs and manage patient scheduling more effectively. |
